

Product Advantages

Product advantages:

- 1, Self-developed software one-click import, general worker takes 2 hours to be skilled.
- 2, Independently R&D industrial vision system to realize cutting of irregular printing patterns.
- 3, Taiwan linear guide rail transmission system, precision ± 0.1 mm.
- 4, Japanese Panasonic servo system, production efficiency increases more than 4 times.
- 5, Automatic pulling and receiving, save time and energy.
- 6, Unique tools exchange system, one machine solves a variety of processes.
- 7, This model has won 7 patents technology certifications at home and abroad.

Applicable Materials:

TECHNICAL PARAMETERS

Model	1625PAS /	1825PAS (Accept customization)		
Working Range	1600*2500MM / 1800*2500MM		Rated Power	11KW
Product Size	3560*2350*1221MM / 3560*2550*1221MM		Rated Voltage	380V $\pm$ 10%
Cutting Thickness	$\leq$ 50MM		Interface	Enternet port
Cutting Speed	0-2500MM/S		Control Panel	LCD touch screen
Cutting Tools	Tools can be easily changed, with oscillating, circular knife, kiss-cut tool, v-cut Tool, CCD Camera, and so on.			
Cutting Material	Paperboard, grey board, corrugated board, honeycomb board, KT board, foam board, car sticker, PP Adhesive material, EPE, EVA, PVC board, acrylic board, and so on.
